

Giborim Ktanim – Resilience Stories for Children

Product Vision

A digital platform that creates personalized emotional resilience stories for children, helping them process fears, transitions, and emotional challenges through storytelling.

Core Principle

This is NOT an AI tool. It must feel like a magical children's book experience, not a form or system.

Target Audience

Primary: Parents of children ages 3–7.
End user: The child.

Business Model

Digital personalized books with tiered pricing:

- 10 pages – ■39
- 15 pages – ■49
- 20 pages + audio – ■59

Upsells: PDF print version, additional voices, extra languages, additional books.

System Architecture

1. Landing Page – emotional conversion
2. Wizard – core creation flow
3. Generation Engine – story, images, audio
4. Book Viewer – reading + listening experience
5. Admin System – management & optimization

UX Principles

- Mobile-first
- One decision per screen
- Minimal typing
- Emotion-first experience
- Soft, calm, non-technical language

Wizard Structure Overview

1. Topic Selection
2. Characters
3. Emotional Challenge
4. What Helps
5. Book Style
6. Summary & Checkout
7. Generation Experience

User Flow Logic

- No login at the start
- Auto-save draft
- Email collected before checkout
- Account created silently in background

Generation Experience

A magical loading screen showing:

- Collecting characters
- Writing the story
- Creating illustrations
- Recording narration

Final Product

- 10–20 illustrated pages
- Personalized story
- Audio narration
- Optional printable PDF

Technical Stack (Suggested)

Frontend: HTML/CSS/JS (or React)
Backend: Node.js / Firebase / Supabase
AI: Text, Image, and Voice generation APIs

MVP Scope

Must have:

- Landing page
- Basic wizard
- Story generation
- Payment
- Book output

Nice to have later:

- User accounts
- Library
- Sharing
